

The Zodiac Killer & The Real Pirates of the Caribbean

Not for the Faint Hearted!

Released January 7th 2008

For those of you curious about the facts and faces that inspired some of this years blockbuster movies you need look no further than the January releases from Go Entertain. Straight from the History Channel®, '**Cold Case Files' The Zodiac Killer** and **The Real Pirates of the Caribbean** make for riveting viewing and a shocking insight into the dark history behind the films.

"Cold Case Files" brings to your screen some of the most twisted and fascinating true crimes ever seen. The Zodiac Killer terrorized Northern California over a ten month period, killing five known victims and being suspected in 37 other unsolved murders. More than thirty years after his killing spree, San Francisco investigators re-open the long inactive case and return to the evidence to see if DNA testing can reveal the identity of "The Zodiac Killer".

Have you ever wondered where all those pirate stories you heard when you were growing up came from? Well now you can find out...

From Captain Black Beard to Calico Jack, Black Bart Roberts to Henry Morgan and Anne Bonny – These were all well known and feared criminals who terrorized the waters of the Caribbean targeting the parade of treasure and cargo bound for Europe.

When the Pope granted Spain exclusive rights to the Caribbean and most of the New World, the Spanish reaped an immense fortune in gold and silver, but as with everything, it came with a price... England, France and Holland all desired a portion of this wealth and each established Caribbean bases using 'privateers' - private sailors fighting for profit – to protect their interests and steal Spanish treasure. So were born some of the most fearsome buccaneers ever to roam the seven seas!

With state of the art animation, reenactments and interviews with historians, authors and experts, this brand new production from The History Channel® examines the golden age of piracy and how their deadly profession captured the imagination of the world over.
